Love of The Wild

BY ARCHIE P. MCKISHNIE
Printed by Special Arrangements with Thor Allen, Toronto, Ont.

(Continued.)

As they approached Declute's home which was a house of logs close to the shore of Rond Eau, a couple of wire-haired mongrel pups came yelping out to meet them.

"There's David and Goliath," said Declute. "The great named them dogs."

She's great on Bible names is Rachel—too danged great," he finished in a lower key.

Gloss opened the door and stepped inside. Mrs. Declute turned slowly from the table and a smile spread across her flour-streaked face.

"Oh, you dear," she said, bounding forward and implanting a resounding smack on the girl's rosy cheek. "You little dear, to come just now of all times, when I most wanted to see you."

Mrs. Declute smiled again and a bit of powder fell from her face. She was a big matronly face, with big-heartedness written clear across it, and real kindness beaming in its large black eyes. She was a big woman, "high two hundred and thirty," as Declute put it.

"Where are babies?" asked Gloss, sitting down on a stool and glancing about the small room.

"Sleepin' like angels, th' trouble-some little good-for-nothin's," smiled the woman fondly. "Moses is just that trouble-some I think sometimes I'll have to tie him up. Only this mornin' he upst the cradle and spit little Martha out on the floor ker-bump. Give my life if I wasn't so provoked I could have beached him if he hadn't been just gettin' over the jaundice."

"And he tells me that you are thinkin' of havin' a loggin'," said Gloss. "Is there anythin' I could do to help you, Mrs. Declute?"

"Just what I was wantin' to see you about," cried the beaming woman, sitting down and wiping her face with her apron. "I thought first as I'd run across to 'Rother for a minute or two, and then I'd come over. Then I thought about her havin' that teacher boardin' there, and I didn't want to put her out any. Fine cook is the widdler, but somehow I can't think as anybody can cook meats and serve 'em up quite like you, Glossie. I'm fixin' up some dried-apple pies. Sent over to Bridgetown this mornin' by Jim Peeler for the dried-apples. I guess he'll be along soon."

"He's comin' right now," called Declute from the door. "I'll go along and give him a hand, I guess. He's got some tobacco for me—leastways I hope he has; I sent for some."

"Ain't that a man for you?" winked Mrs. Declute. "Ain't that a man, though? Glossie, my dear, don't you ever marry a man; don't you ever do it. You'll be sorry all the days of your life if you do. Even I am almost sorry sometimes, an' Anders ain't no exception of a man. There ain't no other like him. And sakes alive, he's bad enough, dear knows."

Anders and a short, heavy-set man entered, and the latter laid a number of parcels on the table. He looked jolly round red face with cross-eyes about the corners of brown eyes, stamped there by much smiling. It was said of Jim Peeler that he had never been known to lose his temper. He stood a short rife in the corner and sat down near the table. Mrs. Declute arose and brought a steaming tea-pot from the hearth, also a plate of bread and cold meat.

After disposing of a goodly portion of the victuals before him, Jim turned to Gloss with the question:

"How's the sick?"

"No better," answered Gloss, her face growing grave.

"Dear me, how thickless I am!" exclaimed Mrs. Declute. "I knowed there was somethin' I wanted to ask you, Gloss. That's it. How's th' dear little woman?"

Anders was cutting off a piece of black chewing tobacco from a slab.

"Why don't you tell old Betsy 'bout her?" he asked.

"Shut up Anders," flashed his wife. "He's a Christian, or be you a heathen as believe in witches?"

"There, there," laughed Peter soothingly. "I guess Anders is a good Christian. But I was talkin' to a real Christian today; a real pious, right-danged good man."

"Snythe?" questioned Declute, the piece of tobacco poised half-way to his expectant goal.

"The same," answered Peter. "And by the way, I met that man Watson as I was comin' home. He must have been over here, eh?"

"He was here this mornin'," said Gloss. "He was tryin' to buy our place."

"Oh, was he?"

Peter's face lost its smile and his bushy eyebrows met in a scowl.

"How about you, Anders?" Declute squirmed.

"Oh, I ain't thinkin' much about it, Jim. I ain't worryin' none."

"His wife gazed at him contemptuously."

"You ain't brain enough to worry about anythin'," she exclaimed. "Was that Watson ridin' alone, Jim?"

"We'll, no, he wasn't. That teacher chap was with him. He was ridin' the bay belongin' to Hallbut's engineer."

Gloss looked up, her eyes wide.

"Then they were together?" she asked.

"Yes," replied Peter. "I suppose the teacher was teachin' him through part of the bush. I was talkin' to Blake, the sawyer, over at the mill a while ago, and he tells me Watson and Hallbut were in the bush together. He was to help get our timberland."

"Whereabouts on the trail did you meet 'em?" asked Declute.

"Why, they had only got nicely started I guess. It wasn't more than two or three miles out at most."

"Where was Watson been all day, I wonder?" cried Gloss. "He was at our place shortly after sun-up."

From the next room came a commotion, and three round-eyed youngsters, between the ages of three and six, protruded their heads from beneath the kitchen door-curtain.

"Get back in there, Mrs. Declute," commanded the mother. "You ain't had half enough sleep yet."

"Oh, let me hug them, Mrs. Declute!" pleaded Gloss.

She ran across and gathered the babies up, all together, in her arms. They twisted their chubby arms about her neck and rubbed their sleepy eyes against her face. They were sweet-voiced youngsters, and the girl loved them. She kissed them, then set them down.

"Guess we'd better be goin', Anders," she said, "if you have to come. But I'm not the least timid about goin' alone."

"Course he'll go," declared Mrs. Declute, and you too, Jim Peeler, 'cause I've got to get on with them pies. Tell Libby the bee's nest Thursday, and I'll want her to help with the table. Much obliged for your kindness, Jim. Good-night, Glossie."

CHAPTER IX.

"Guess I'll step through the oak ridge here and look in on Bill Paisner for a minute or so," said Jim Peeler, as the three set the path leading to the creek.

"He's singin' his old pet song," smiled Gloss. "Hark, can't you hear him?"

Upon the tree-fringe of Rond Eau a red head of sun wet dripping hair, and a smelly glory above, the old wood was full of life and harmony. From the thickets the hardest of the song-birds were bidding good-by to the wood. It was their last night in the old nesting-place.

"Mingle with the symphony came Paisley's voice, trilling happily:

"Massa's gone away, de darkey say, 'Ho, ho!'

"Mus' be now dat de kingdom's comin' I'd e'ar ob jubilee."

"He's a happy beggar," chuckled Declute. "He's a happy beggar, is Bill, and the biggest-hearted, softest-hearted baby of a man as ever lived."

"God built some big things," said Peeler; "that," waving toward the mellow glory above, "th' lookin' about him; an' Bill. Yes, he built Bill, and nobody has ever spoiled his work."

(To be continued.)

Heavy Yields of Rye Grass

Threshold Out at the Rate of 303 Lbs. Of Seed to the Acre

In an experiment conducted at the Dominion Experimental Station at Beaver Lodge, in northern Alberta, recently, it was found that rye grass threshed out at the rate of 303 pounds of seed to the acre, all of which has graded No. 1 at the Calgary Seed Laboratory. This yield at the current retail price for rye grass would come to over \$90 per acre. The superintendent of the farm states that owing to the conditions of harvesting and threshing, he is of the opinion that not much more than half the yield was recovered.

New experiments are being made at this station all the time with a view to ascertaining which varieties of grain and other crops yield best in the higher latitudes and are most suited to the climatic conditions of that part of the province. Already many very valuable results have been obtained at the Beaver Lodge and at the other Experimental Farms and Stations in various parts of the prairie provinces and much useful information brought to light.

Scheme to Get Teachers

As a measure toward overcoming the more or less chronic shortage of teachers, the Saskatchewan Department of Education has decided to grant to British teachers, who have taken a two years' training college course in the old country, the highest professional standing valid in this province, a first-class certificate, subject to their work in this province being satisfactory.

An English Journalist In Canada

Different Conception of Canada Says Sir Charles Starnie

"The astounding prosperity one sees everywhere," it was said in the English Echo, Darlingford, Yorkshire, who declared that as a result of the visit of the newspapermen from the old country Canadian stock would boom in England. The newspapermen in the past had, he said, not given enough publicity to Canada. The governments, provincial and federal, had done their work well, but they had not been supported as they should by the newspapers. Now newspapermen were seeing things in the past much greater refinement everywhere, he observed, "and a noticeable improvement in the cities and buildings. Even in fifteen years," said he, "the progress is amazing. I have just had another look around this great city of yours which has in it the making of a city with a population of a million within the next 25 years."

Sir Charles, before this comment, had dwelt upon the enthusiasm with which the people of Canada undertook things. "To people from the Old Country it is rather terrifying the tremendous projects you back as, everyday affairs." As an olderman of years service in his own city he indicated he could speak from experience.

Contrasting the profusion of food he saw everywhere with what he described as the extremely short supplies in England, Sir Charles Starnie alluded to the severe rationing during the period of the war. Canada, to him, appeared to be recovering more rapidly from the effects of the struggle. "You seem to have got back to absolute peace conditions here," he remarked. "We have not yet reached that ideal stage." The people, he said, also seemed to be more contented. — Winnipeg Free Press.

Farmer Should Grow Own Trees

Home Nursery is Cheapest Method For Prairie Farms

The question is often asked by the Journal readers: "If the nursery station at Indian Head is already producing trees for prairie planting, why not up to its capacity, how is any new demand to be met? Can farmers grow their own trees from seed?"

Mr. Norman M. Ross, chief of the Tree Planting Division, has the following to say regarding the farm nursery under present conditions:

"Where seeds of native trees can be obtained the cheapest method of getting seedlings is for the planter to grow them himself. Most of the hardy varieties are very easily raised from seed, the labor and expense in this connection on a farm amounting to very little."

Seed should always be procured, if possible, from mature trees growing under climatic and other conditions similar to those the seedlings will be expected to endure. The Manitoba maple has a very wide range, and seed might be procured almost anywhere in North America. It would be found, however, that that picked in the Southern States or even in Eastern Canada, would not produce seedlings hardy in the prairie provinces. The growing season is much longer in the East than in the West, and it has been found that seedlings from eastern seed do not ripen up or mature early enough to escape the late frost on the prairies, and are consequently cut back. The greater the difference there is between conditions of growth and those of the parent trees and those experienced by the seedlings, the greater the difficulties the latter have to contend with. This shows that many characteristics are acquired by the seed from the parent trees, so that it would always be wise to get seed from the best individuals, and to avoid, where possible, taking it from dwarf or stunted trees. Seed from young trees do not generally have so good a germinating percentage as that borne by mature ones.

The amount of land a farmer would require for his nursery is very small, in fact, one quarter to one-half an acre would be more than sufficient in the ordinary case. Any land that is in a suitable condition for growing garden crops and is at the same time undisturbed by frost or high winds, would do for this purpose. The best soil for the nursery is rich, sandy loam. It should be located near the house so that the work could be done in odd moments.

12,000,000 Children Orphaned by War

Twelve million children in Europe lost one or both parents during the war, it is shown by compulations gathered by representatives of the Red Cross, in eighteen countries. Russia leads with four million, and France has one million. Albania is last on the list with 17,000.

Aromatic honey excelled in no other locality is produced by the bees of Malta.

DRAGGING BACKACHE QUICKLY RELIEVED PERMANENTLY CURED

Painful back trouble indicates diseased kidneys. Don't neglect the first symptoms. When you can't sleep or bend without suffering pain. When you notice urinary disorders, dizziness and constant headaches. When your back aches, morning, noon and night, when lameness and stiffness oppress you. Then will the telling merit of Dr. Hamilton's Pills make you feel better, one day.

Dr. Hamilton's Pills exert a wonderful influence on the diseased tissues of the kidneys. They heal and soothe, health, health, health, and new life into the kidneys, and thus prevent a return of the trouble.

Kidney suffer, health suffers, and happy cure is right at hand in Dr. Hamilton's Pills. Note carefully the above symptoms, if they fit your case, don't delay, but get at once your dealer and procure the unfailing Dr. Hamilton's Pills of Mandrake and Bitternutt, sold in yellow boxes, 25c each.

Canada's Water Power An Industrial Asset

Estimated That 20,000,000 Horse Power is Undeveloped

It is indisputable that one of Canada's great industrial assets in the near future will be an amplified use of her magnificent water-powers. These are capable of great development notwithstanding the enormous progress reported; and at a time when industries are hard hit by the scarcity or dearth of coal, fresh water-power installations will "keep the pot boiling" in more senses than one.

The Water Powers Branch of the Department of the Interior has compiled and brought up to date statistics bearing on the available and utilized water-powers of the Dominion. This shows that there are nearly 20,000,000 horse-power still undeveloped, that the total water-wheel and turbine development is about 2,500,000 h.p. and that the ultimate designed capacity of plants now operating or under construction is 3,380,000 h.p.

Canada has utilized, or arranged to utilize, about one-sixth of the water-powers of the country, not including the international water-powers of the St. Lawrence.

The Valleys of the Ocean

Atlantic Covers Two Nearly Four Miles Deep

The Atlantic ocean covers two vast valleys. One of these passes between the Cape Verde Islands and the Azores, and is of great depth. It runs close up to Europe, and comes to an end near the British Isles, where a ridge or crest of land separates it from the basin of the North Sea.

The other valley runs in the main parallel to the first, from which it is separated by an elongated strip of land, of which the Azores form a continuation above the water. This strip does not exceed a depth of 9,850 feet, while its height amounts to 6,560 feet.

The first valley, like its confrere, is also very deep, its bottom being situated at a depth of nearly four miles below the surface. Passing along South America and leaving the Bermudas to the left, it almost touches upon Newfoundland and Labrador finally ending just south of Greenland.

The sub-Atlantic landscape thus consists of two vast parallel valleys or mountains. Farther north the land lies higher, and the sea is, relatively, speaking shallower. Between Greenland and the continent, close to Iceland and the Channel Islands, there is a large plain free from any depression worthy of mention. It thus appears quite clear that at one time England was connected to the continent.

Interesting Venture

The Canadian Abrasive Company, at Victoria, B.C., has been incorporated with a capital of \$100,000, and will have a factory in operation at Vancouver within a short time. The paper used in the manufacture will be obtained from local plants, and the hard rock from the limitless supplies of the British Columbia mountains. This is believed to be the first purely Canadian venture of this kind, and the initial plant is to cost about \$500,000. The provincial department of industries has loaned the company \$25,000 over a period of ten years.

Piano 200 Years Old

The oldest piano in existence was made by Cristofori in the year 1720, and is still in good condition. But its sound is more like that of a harp than a piano, for its wires, instead of being struck by hammers, are plucked by points of quill or of hard leather.

Discover Oil Flow

Oil has been struck in small quantities in the well of the Imperial Oil Company at Fort Norman in the far north, at a depth of 450 feet, according to word received in Calgary.

Mineral Wealth Of Spitzbergen

Richer Than Was Generally Imagined—A Decade Ago

Four months of sunlight in the year, but the sunless winter in the mining regions is not so cold as it is in Canada, thanks to the neighborhood of the Gulf Stream and the prevalence of the westerly winds, and there somebody presses a button, switches on the electrical current and illuminates the mining villages with electric light. The work goes on, and the coal fields, says the London Times Trade Supplement, are still estimated to hold more than 200,000,000 tons of coal, which is interesting information nowadays, even to the American citizen, whose coal bin is such a long way from Spitzbergen.

These, however, are the beds of the steam coal; and those which contain household coal are said to be even more extensive.

Nor is Spitzbergen without interest to the man who runs an automobile, as well as to the man who runs a furnace. There are muddy pools on the islands, where gas bubbles up through the mud, and last year an analysis of the gas showed that it contains a large percentage of petroleum. A new and hitherto unsuspected source of fuel had probably been revealed by those bubbles of gas, and now arrangements are being pushed to prospect the region thoroughly with the likely result of finding a new oil-bearing region. Spitzbergen is richer than was generally imagined a decade ago; during the last few years, iron, copper, lead, gypsum, asbestos and other minerals, as well as promising hints of gold and silver, have been discovered, and large beds of colored marble have been opened.

All of which is interesting to the world at large, and particularly interesting to the British interests, which have acquired ownership of about three-quarters of the mineral area. Norwegians, Swedes, Dutch and Germans are also busy developing this island wealth, over which, by the decision of the League of Nations, waves the sovereign flag of Norway.

He Ought to Know Better

There is no use trying to joke with a woman. The other day Jones heard a pretty good conundrum and decided to try it on his wife.

"Do you know why I am like a mule?" he asked her when he went home.

"No," she replied promptly. "I know you are, but I don't know why you are."

Chinaman's Five Buttons

There are always five buttons on the Chinaman's coat to remind him of the five virtues recommended by Confucius—Humanity, justice, order, prudence, rectitude.

FACE WAS FULL OF PIMPLES

For Three Years, Hard and Awfully Sore, Disfigured. Cuticura Heals.

"I had been suffering with a pimply face for three years. My face was full of pimples and they were hard and swollen. They were itched and dried up, and were sore, and disfigured my face. They caused me to lose a lot of sleep, and were awfully itchy, making me scratch and irritate my face."

"I started to use Cuticura Soap and Ointment and I used two cakes of Cuticura Soap and two boxes of Cuticura Ointment, when my face was healed." (Signed) Clifford Yeomans, East Chesham, N. S.

Use Cuticura every-day for toilet purposes. Bathe with Soap, soothe with Ointment, dust with Talcum.

Soap 25c, Ointment 25c and 50c. Sold Everywhere. Free literature. Dept. of Hygiene, Limited, St. Paul St., Montreal. Get Cuticura Soap and Ointment without cost.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All, without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nine years and now made in Canada. Always look for the unbroken package of "Bayer Tablets of Aspirin," which a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer" Aspirin the trade mark (Registered in Canada) of Bayer Manufacture of Monocarbolic Acid of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company were stamped with their general trade mark, the "Bayer Cross."

Contains proper directions for Colds, Headache, Toothache, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost, but of "Bayer Tablets of Aspirin," which a few cents. Larger "Bayer" packages.

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style.

Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this kind of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

For quotations apply to publisher of this paper.

Britain Leads in Shipbuilding

United Kingdom Regains Supremacy Over States in Ship Construction

Harrison Watson, chief Canadian Trade Commissioner in the United Kingdom, in a report to the government, emphasizes the success of the United Kingdom in regaining her former place of supremacy in ship-building held in pre-war days. He stated that owing to the uninterrupted increase in the tonnage of merchant vessels under construction in July, the United Kingdom has almost recovered her position of a year ago in comparison with the United States. A year ago the tonnage building in the United States exceeded that under construction in the United Kingdom by 1,350,000 tons, while the surplus at the present time in favor of the United Kingdom is about 1,470,000 tons. "It seems scarcely necessary to state," says Mr. Watson, in his report, "that the extraordinary increase in American ship construction which took place during the war was due to unique circumstances which have now largely passed away."

A little flour by any other name would doubtless sell as wheat.

Study of Sugar Production Introduced Into School Course

Boys of the sixth, seventh, and eighth grades of the public schools on the island of Hawaii are contract planters and are raising sugar cane in connection with the industrial work being done by them in the regular public school course.

Study of sugar production has been introduced this year into the school course. Each boy electing to take this course signs a contract with a plantation for the cultivation of a tenth of an acre of cane. In connection with the practical work the student study the processes of production from the planting of the cane to the marketing of the sugar and its by-products.

The Hanokaa School, for example, started this year with 20 pupil contractors on two acres of school land. Hanokaa school has 19 boys who have rented land from the plantation. The returns from this work accrue to the pupil. He pays rent for the land and secures customary advances for fertilizer, planting and other charges, on which he pays interest at the rate of seven percent.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All, without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nine years and now made in Canada. Always look for the unbroken package of "Bayer Tablets of Aspirin," which a few cents. Larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer" Aspirin the trade mark (Registered in Canada) of Bayer Manufacture of Monocarbolic Acid of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company were stamped with their general trade mark, the "Bayer Cross."

Contains proper directions for Colds, Headache, Toothache, Rheumatism, Neuritis, Joint Pains, and Pain generally. Tin boxes of 12 tablets cost, but of "Bayer Tablets of Aspirin," which a few cents. Larger "Bayer" packages.

There is a heavy demand just now for triplicate books. We make a great variety of triplicate books, both in separate carbon leaf and black back style.

Write us for sample and prices before placing your next order, or ask any of our agents to give you this information.

Vegetable Parchment Butter Wrappers

We are in the best position of any firm in Canada to fill your order promptly for parchment butter wrappers, either printed or plain. We are large importers of this kind of paper, and have special facilities for printing wrappers in either one or two colors of ink.

WAXED PAPERS

We also manufacture a complete line of waxed bread and meat wrappers, plain or printed, waxed paper rolls for home use, and waxed papers for all purposes.

Our equipment is the most modern and complete to be found in Canada. Our goods are first class and our service is prompt. Let us prove this to you on your next order for Counter Check Books, Parchment Paper, or Waxed Paper.

A. Menzies, for some years on our High School Staff, and who went through the great war with the British forces, is visiting in town. He has secured a position on the staff of the Edmonton Normal School. We are pleased to see that Mr. Menzies is almost recovered from severe gas poisoning.

Used text books, high and public school, may be obtained at Folia's Drug Store.

Motion Pictures have been used for entertainment, and for education along almost every line. But "FIT TO WIN" is the first and only film to speak frankly on the causes and effects of venereal diseases. This picture will be shown at the Rex on Monday to Women only, and Tuesday night to Men only. DON'T MISS IT.

Baseball by Barney

By a score of 8 to 3, the Innisfail Senators were defeated by the Lacombe team composed of the following players: Vaughn, Chuck; Green; Watt; P. Danner; Teare; Gunn; Hyde and Oscar Johnson the jitney driver, who was used to fill up a vacancy.

The game was good from start to finish and the boys proved themselves whirlwinds at the game. The above boys are Lacombe's coming players and we hope next year to see them good enough to play Chicago.

If it was not for the large score one would be led to believe that it was a fluke that the game was won by our team; but it was real ball that

won out.
Fatal Accident
Robert E. Lang was instantly killed on Wednesday last by a bullet from a 22 rifle. Lang was employed by Thos. Strick, a farmer near Ponoka, and was standing on the porch watching a young son of the employer trying to extract a shell that was jammed in a rifle. The rifle was discharged and the bullet entered Lang's temple, death ensuing almost instantly. Coroner Graham was notified, and decided that an inquest was unnecessary, as the death was caused by accident.

F. S. Bunch Selling Out
F. S. Bunch, one of the old timers of Rimbey, is selling out all his property and has instructed C. F. Dameron to hold an auction sale at Rimbey on Wednesday, Sept. 15. He is offering a good lot of horses, including a pure bred Percheron Stallion, a full line of harness, farm implements, and several pieces of town property, including livery barn and other buildings. See posters and full list in next week's paper.

Auction Sale
Messrs. Cadec and Strause, 2 1/2 miles west of Springdale, 6 miles east of Haverhill, in the Rimbey district, will sell all their farm stock and implements by auction on Thursday, Sept. 16. See full list in next week's paper. C. F. Dameron, Auctioneer.

"My Lady's Garter" Mystery Romance at the Rex Tonight
Maurice Tourneur has made a thrilling motion picture out of Jacques Futrelle's well-known mystery-romance, "My Lady's Garter," which is to be shown at the Rex theatre for two days commencing yesterday. The story centres around the pursuit of a baffling international thief known as "The Hawk," and involves the love affair of a young Englishman who was for a time suspected of being the criminal and the daughter of a railroad magnate. The plot is spirited in the extreme, and involves such thrilling scenes as the near-crash of two railroad trains, an exciting pursuit on the water in yachts and the escape of "The Hawk" by a leap from a second-story window and his final end in motorboat explosion. Prices 15c and 35c.
DON'T FORGET—IT'S TONIGHT

Some Ball Game

By a score of 16 to 13 the Lacombe intermediate ball team defeated the Chinese Y. M. C. A. (Calgary) team on Friday night last after a hard fight. The Chinese team is fairly strong, but the boys are just a little slow in getting after the ball. Some of the players were exceptionally good, and all of them had their hearts in the game. Our boys were in good form, and Pete certainly pitched some ball. His pitching was too strong for the visitors, and they made most of their runs on errors. Vaughn was umpire, and his decisions were erratic, and in some measure favored the Chinese boys. After getting struck on the head by a pitched ball, the Chinese manager attempted to hire Peter to go over to China and help with the war, but he declined.

Old Settler Gone

Mr. James Huston Vliet, one of the pioneer settlers of Rimbey, Alta., was born in the state of Ohio, May 5, 1848. At an early age, he moved with his parents to Illinois, after which they again moved to Kansas, where he was married; to this union six children were born. At the age of 15 he had the misfortune of losing his left hand and arm. He remained in school until his education was finished, and taught school for a number of years, serving two terms as Supt. of Public Instruction of Wilson Co., Kansas.

He believed in the Gospel of Jesus Christ and united with the New Light or Christian Church in which faith he died.

He maintained an interest in both local and state affairs as well as the school. His was a character both firm and cheerful, always giving to the children of comfort and cheer, the children loving his position.

He came with his family to Alta., in the year 1902, taking up a homestead where he resided at the time of his death. He was overtaken by a peculiar form of Bright's Disease, which had greatly weakened his once strong body and to which he succumbed on July 8, 1920 at the age of 72 years, 2 months and 3 days. He was preceded in death by a little daughter and one grandchild, leaving to mourn his loss, his wife, two sons, and three daughters: Max and Harry Vliet and the writer of Rimbey; Mrs. Melvin Roe of Blackfalds and Mrs. D. A. Whitesell of Bentley; three brothers and a sister living in the States; fourteen grand-children and a host of friends. Thus a useful life has closed and we now say good-bye until Eternity's morn.

Written by his daughter;

Mrs. H. M. Irwin, Rimbey.

PROVINCIAL HEALTH DEPT.

STARTS BATTLE AGAINST SOCIAL VICE
Following the announcement in The Calgary Herald a few days ago, that arrangements had been made for treatment of social diseases in the city comes the announcement that the department of Public Health, are circulating a motion picture, entitled "Fit To Win," the only one of its kind ever prepared and the first picture to speak frankly on the causes and effects of the diseases.
The film which will be shown to

men only, over the age of 16 years, was produced by Lieut. E. H. Griffith, under the direction of the surgeon general of the U.S. Army.
This picture will be at the Rex next Monday and Tuesday, 30th and 31st.

Strayed from Lacombe, Aug. 21
Small Hereford Cow, white face and branded quarter circle with lazy J under on left hip. Went east and north towards Milton school. Reward for information. Phone 11 Lacombe.

IMPORTANT NOTICE

Tax Recovery Act
To all parties whom it may Concern
Take notice that the Provisions of the Tax Recovery Act are operative for the year 1920 within the bounds of every municipality, urban or rural, and every improvement District, of the Province of Alberta.
The land will be advertised for sale as soon after August 14th as possible, by the Municipal taxing authority and on the day and hour and at the place mentioned in the advertisement, will be sold for the taxes in arrears as of date December 31, 1919, together with the costs. Owners, mortgagees, encumbrances, and any others interested should communicate with the Municipal authority levying the tax. The arrears and costs may be paid up to the time of sale, and after the sale there is one year for the redemption of the land.
J. H. LAMB,
Deputy Minister of Municipal Affairs

Alberta Has to Pay 6.48 For Money
Hon. C. R. Mitchell, provincial treasurer, last night announced the sale of \$2,000,000 of Alberta bonds to the United Financial Corporation at 96.58. The tender is on the basis of 6.48. This is part of a borrowing of \$7,000,000 planned by the province for this year for which the greater part is for telephone development.

Mr. Mitchell said that this was the highest of any bona fide tender of which there were six. Two firms R. A. Daly and Co., and W. A. Mackenzie and Co. quoted higher prices, but

Gas Struck at the Asylum

Natural gas has been struck in the well being bored by the provincial department of public works on the Asylum grounds Ponoka. Drilling operations have been going on for some time past, and what looks like a real strike was made at the end of the week.

A pressure of 625 pounds was registered at the well on Saturday, and the prospects for a good flow were very hopeful. The hole has been capped and the work of connecting up with the power house of the asylum plant is now under way.
This is not the first time that gas has been found at Ponoka, but previous strikes have proved to be only pockets that were soon exhausted. The pressure is higher now than on any of the previous occasions, however, and the hole appears to be entirely dry. Both these conditions are looked upon as favorable to the strike proving out satisfactorily, and a thorough test will be made to see how the supply holds out.

Bassoff Stands Trial on Two Murder Charges

Lethbridge, Alta., Aug. 18.—Thomas Bassoff the train bandit, was committed for trial at noon Wednesday 18th by Magistrate Burrell, on two charges of murder, and he will stand for trial at MacLeod, at the criminal assizes to open there on October 12. No bail was allowed and he will be held in the provincial jail here until the trial takes place.

The chief witness Wednesday morning was Constable Frewin of the Alberta Provincial police, who had entered the Bellevue Cafe identified the two bandits in the booth and ordered them to put up their hands. Akroff, he said reached for his gun and witness started to shoot. He emptied his gun into the bandit, and retired in favor of Const. Baillie, who came on the scene through the back door of the restaurant. While he was dealing with Akroff, Corporal Usher had Bassoff covered, but witness said that, so far as he could remember, there had been no other shooting while he was in the restaurant, but what he did himself. After he went out to reload his gun, however, a regular fusillade inside the building and the next thing he saw was Baillie and Usher mortally wounded in the doorway of the restaurant. He was dazed by this. Akroff appeared badly wounded and then Bassoff appeared, coming out the door, shooting with both hands. He shot at both constables as they were lying in the doorway. Other witnesses were Fred Wolma-

home, a flour and feed merchant of Bellevue, and W. L. Evans of Blairmore, who was in Bellevue at the time of the shooting.
Only one gun was used by Bassoff during the shooting; a Colt .45 was produced in court. He is believed to have thrown the other away, but that he had two during the fighting was sworn to by no fewer than six witnesses who saw the shooting.

To Undertake Organization Of Provinces

OTTAWA, Aug. 18.—A general scheme of organization for the province of Ontario was laid down at today's meeting of Ontario members of parliament and senators, supporting the National Liberal and Conservative party. As a result of today's meeting, steps will be taken toward the formation of an executive to carry out the plan outlined in the discussions of party organization and the needs in this province.
There was, it was stated, practically a full attendance at today's meeting which was held in camera. No formal statement was issued at the close, but Premier Meighen outlined the work which had been carried out. Co-incidental with the present statement it was learned that Dr. W. J. Black had resigned the chairmanship of the soldier settlement board, and would direct the organization of the Liberal and Conservative party.

Stand Up For the Law

Recent events in Canada, both east and west, point to the necessity of great care being exercised, not so much by the authorities, perhaps, as by the people in general to safeguard one of the Dominion's finest traditions and at the same time protect the liberty of the citizen.

Canada has long been recognized throughout the world, and especially in the great republic to the south, as a country where law was respected and obeyed, where even-handed justice was administered to high and low, rich and poor alike, and where sooner or later the long arm of the law would get the guilty. In the United States, where so many murderers escape just punishment for their crimes, where the law's delays are almost interminable, and where, as a result of a lack of public confidence in the machinery of justice, lynchings are not infrequent, the reputation borne by Canada was an invaluable asset. It is an asset Canada cannot afford to lose, nor allow to be lessened.

A few weeks ago, however, a group of men in southern Saskatchewan took the law into their own hands and drove a law agitator out of the country, threatening him with tar and feathers if he returned. On August 16, at Thorold, Ont., a mob stormed the town jail and finally set fire to it in an effort to take a prisoner from the officers of the law in order that they might execute him themselves, although he had not yet been found guilty of the crime of which he was accused. Fortunately, common sense and an appeal to British fair play was effective in restraining the passions of the mob before it took the irreversible step.

People, however, must be on their guard against such exhibitions and acts, if Canada is not to suffer in the eyes of the world, and the rights and liberties of its own people placed in jeopardy. Even in the earlier days when the west was "wild and woolly" and at the time of the great stampede to the Yukon, law was maintained and respected so effectively as to call forth the admiration of all countries. It is as necessary as ever that it should continue to be maintained. The world has passed through a great war when human life seemed to be the cheapest commodity in the world, and as a result many people do not look upon the take of human life as seriously as of old. But the old conception of the sacredness of human life must be firmly re-established, and it is the duty of all citizens to assist by precept and practice to such restoration, and to oppose by all legitimate means in their power anything that tends to weaken and destroy confidence in the law.

The maintenance of law and order is the foundation of any organized state. Without respect for law, and lacking order, society could not exist, all property would soon cease to have any value, family ties would be dissolved, and human life would be the plaything of the murderer and assassin.

Do away with law, and respect for it—which, of course, would follow the non-enforcement of law—and disorder would reign supreme. All mankind would revert to only one law—the law of the jungle, the law that might is right and must and will prevail.

Every man and woman realizes in their innermost beings that this is true, and that the whole organism on which human society rests has been evolved and erected because of general acceptance of the absolute necessity of a state of law and order. Mob rule is evil and vicious in the highest degree.

The maintenance of order rests absolutely in respect for and the upholding of the law. And the upholding of the law—which, after all, is but the concrete expression of the will of the majority of the people—is dependent upon respect for and unequal support of those who are appointed to administer the law, which the people through their elected representatives have enacted for the common good and protection of all.

There can be only one outcome resulting from a loss of public confidence in the administration of justice in this country, and through the acts of the people taking the law into their own hands—law will be superseded by license, anarchy will reign.

place order. Life and property will become playthings of the passions of men, and all those precious liberties and that freedom, to defend and maintain which our heroic soldiers died and suffered in their hundreds of thousands, and which alone can be maintained under a system of law and order, will be destroyed, and a state of disorder and chaos prevail.

Every person who joins in or cheers on a mob is undermining the very foundations of that law which is his own safeguard and the protection of his family and his property.

To Make a Pound of Honey

It is Clear That the "Busy Bee" is Well Named

The Manchester Guardian quotes experts as saying that this is to be a good season for honey, and it adds that many people will welcome the news, though few realize the enormous effort a single pound of honey necessitates on the part of the bees. "In a pound jar," The Guardian explains, "there is a concentrated essence of over 60,000 flowers. It is calculated that to make a pound of clover honey the bees must take nectar from 62,000 blossoms and make 2,750,000 visits in the process. Often the journey from the hive to the flower and back must be made twice, so that the making of a pound of honey entails journeys aggregating over 5,000,000 miles. When it is remembered that a single colony of bees will produce from sixty to eighty pounds of honey in a season it is clear that the 'busy bee' is well named."

SUMMER HEAT
HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heats through the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes he is ill. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. One of these troubles may prove deadly if not promptly treated. During the summer mother's best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

U. S. History at Oxford
From Oxford comes the interesting note that Viscount Rothermere has offered to Oxford University through the chancellor, on terms specified conditions, a sum of \$100,000 for the establishment and endowment of a professorship of the history of the United States of America, to be styled the Harold Vyvyan Harmsworth Professorship of American History in memory of his son, the Hon. Harold Vyvyan Harmsworth, M.C., Irish Guards, formerly commander of Christ Church, who was killed in the war.

Great Fishing Territory
That the lakes of Northern Saskatchewan are from a fishing point of view the finest in Canada, is the opinion of G. Sigurdson, a fisherman who, with his crew of three caught 300,000 pounds of whitefish in Buffalo Lake last year. It is stated that Buffalo Lake is teeming with fish, and is only one of the many similar lakes of the north. The only difficulty is transportation, and with one railway it is estimated that at least 300 carloads of fish could be brought out of the northern lakes each season.

Minard's Liniment Relieves Distemper.

Among the Hindus enormous sums are spent on the cure of the richer classes in sandalwood.

A remarkable bird, found in Mexico is the bee martin, which has a trick of tuffing up the feathers on top of its head into the exact resemblance of a beehive. When a bee comes along to sip the honey from the supposed flower it is snapped up by the bird.

"Tell me," said the doctor to the prosecution, "were you present at the inception of the altercation?" "No," replied the witness, "but I was there when the fight started."

Advocate Tree Planting

Trees of Benefit in Preventing Evaporation in the Prairies

The tree planting car sent to the prairie provinces by the Canadian Forestry Association has been stopped for inspection at many of the leading towns and cities. Mr. Archibald Mitchell, who is in charge of the exhibits in the car is advocating shelter-belts as a protection against soil drifting and other wind damage. "In his opinion ten percent of the country should be under trees to make it fit for habitation."

Questioned as to the method of planting Mr. Mitchell said:

"Strips of wood across each quarter section, running north and south, would go a long way toward solving many of the dry farm problems of the event. If the growing of grasses becomes universal, as is proposed, the trees would be of the greatest benefit in retaining the snow in the winter and preventing evaporation in the summer, thereby storing a greater supply of moisture for the growth of the grass."

Mr. Mitchell maintains that the planting of trees is not a difficult job as one man and one team can plant 1,000 trees in a day, that it takes 1,800 trees to cover an acre at 4x6, which is a work for two men for one day. He says that in two days a team could take much time from the wheat planting season," he remarked. "Usually the farmer neglects planting trees because he thinks he cannot spare the time, but the two days taken out of the middle of the wheat seeding period would not be lost, but would simply be transferred to the end and the small amount of damage incurred by the change through a possible frost is not compared with the advantage to be derived in later years from the trees. Possibly in two or three years the farmer may be thankful that he spent two days to plant them as it is possible the only crop he will have will be that behind the shelter-belt."

Supplies Scarce in Far North

Arrivals from the head of Pelly River, 200 miles north of Fort Selkirk, bear word that the stores in that district have been out of supplies for months. They have not had a grain of sugar since Christmas. The steamer Thistle, however, has just arrived at the head of navigation with ample supplies for the coming winter.

HAIR SOON TOO
SHORT TO DO UP

A little "Dandierine" stops your hair coming out and doubles its beauty

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of delightful "Dandierine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Help your hair grow strong, thick and long and become soft, glossy and twice as beautiful and abundant.

The Riksdag has passed legislation looking to the electrification of the entire system of state railroads in Sweden.

Mittler's Worm Powders do not need the after-help of castor oil or any purgatives to complete their thoroughness, because they are found in themselves. One dose of them and they will be found palatable by all children, will cure the worst trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

Canada Recovering Faster Than U.S. The Wall Street Journal's Boston correspondent quoted a Boston bank official who has just returned from Canada, as follows:

"Canada is going strong, recovering by leaps and bounds from the depression caused by war. While the text and lack of co-operation seems to be holding things back on this side of the border, the Dominion to the north takes an extraordinary interest in activity and prosperity. One of the best reasons for this is that the back is the rich wheat on the northwestern wheat fields."

To Refund Expenses

A refund of the transportation expenses incurred by Imperial soldiers who were domiciled in Canada prior to the war and who returned to this country before the armistice, has been authorized by an order in council.

Prof: What is the meaning of vortex? Abley (excitedly): Oh, I know—it's the extra cent on ice cream and groceries.

A \$1,000,000 crane with a lifting capacity of 1,000,000 pounds is being used at the Philadelphia navy yard.

It was 345 feet high.

SUNDAY SCHOOL LESSON

LESSON FOR AUGUST 22

DAVID'S PRAYER FOR PARDON

There can scarcely be any doubt but what the sin here meant is that which we studied last Sunday, namely David's sin during this time, I and 12. About a year had elapsed from the time of David's sin to his repentance. The thirty-second Psalm graphically pictures the state of David's soul during this time. It was a year of great soul anguish; day and night he was lashed by a guilty conscience. In this psalm we see the path by which a guilty soul may return to God.

1. David's Cry for Pardon (vv. 1, 2). It is well to note his conception of God. He saw him as a God of mercy and loving kindness.

2. "Have Mercy" (v. 1). He knew that justice would forever separate him from God. Because he saw the mercy and loving kindness of God he did not sink down under this weight of gloom and despair. Because Judas Iscariot did not see God as a God of mercy he went out and hanged himself.

3. "But not out of my transgressions" (v. 1). He was fully conscious how many had been his acts of rebellion against God.

4. "Wash me from my iniquity" (v. 2). He knew that it was not enough to have God blot out his sin, for his very person was defiled. He knew that in order to be clean he must be washed thoroughly, and that by God himself.

5. "Cleanse me from my sin" (v. 2). He was not clear that washing would make clean, so he pleads with God to make him clean by whatever process is needed. He was even willing for fire to be applied, just so he could be clean.

6. David's Confession (vv. 3-5).

1. "I acknowledge" my transgressions" (v. 3). He now makes a clean breast of them—he would hold back nothing. There is no way to peace with God but by a full confession of sin. No half-hearted dealing with sin will avail.

2. "Against Thee have I done this evil" (v. 4). All sin is vitally and essentially against God. All our wrong doing with our fellows is against God, for such deeds violate His laws. To heighten all this guilt he remembers that it was done in God's sight, thus showing disrespect and contempt for him.

3. "Behold, I was shapen in iniquity" (v. 5). He confesses not only to these acts of sin, but that he is by very nature a sinner.

4. David's Cry for Deliverance (vv. 6-9).

1. "Make me to know wisdom" (v. 6). He asked God that instead of heart wickedness he might be taught by God himself in his inmost nature.

2. "Purge me with hyssop" (v. 7). David seems to see that in order to be cleansed there is need of applying atoning blood. His prayer soars aloft to the heights of faith to the supreme sin offering, Christ.

3. Restoration (vv. 8, 9). He not only wants pardon, but restoration to the divine favor in Jesus Christ.

4. David's Cry for Purity of Heart (vv. 10-12).

He realized that if his life was to be different, God must dispose his heart toward the right, so he cried for the holy spirit to not be taken away from him.

5. David's Vows (vv. 13-17).

1. To tell God's mercies to others (v. 13). The one who has experienced God's forgiveness at once desires to tell it to others.

2. To sing aloud of God's righteousness (v. 14). He saw that the application of God's mercy and loving kindness was on the ground of righteousness and justice. He had vowed to praise now he vows to sing.

3. To show forth God's praise (v. 15). When the Lord opens a man's lips, then his lips shall sing of his praises.

4. The reason assigned (vv. 16, 17). It is because the sinner has seen the supreme sacrifice, Christ, and with a contrite heart presents the merits of Christ Jesus, God's remedy for sin.

Stowaways Asphyxiated by Disinfectants

Two stowaways aboard the French liner steamship Niagara, which arrived at New York from Bordeaux, were found asphyxiated by fumes from disinfectants in one of the ship's ventilators, where they were hidden. They had hidden to escape detection when the liner entered port. The ventilators were closed when the ship was fumigated at quarantine, but the presence of the men was not discovered until after the ship had docked.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements, its claims are conservative, indeed, when judged by the cures which it performs. Expect real relief and of no other kind when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so-called remedies have utterly failed.

Minard Liniment Relieves Garget in Cows.

A \$1,000,000 crane with a lifting capacity of 1,000,000 pounds is being used at the Philadelphia navy yard.

It was 345 feet high.

WHY EXPERIMENT?

Food scientists claim that the leavener is largely responsible for the flavor, texture and wholesomeness of your home baking. That on no other one ingredient does so much depend. It is important, therefore, to use a baking powder that you know possesses the necessary leavening qualities.

MAGIC BAKING POWDER

Contains No Alum

and is the only strictly high class baking powder in Canada selling at a moderate price. Its reputation is built on purity and highest quality.

The only well known medium priced baking powder made in Canada that does not contain alum and that has all its ingredients plainly stated on the label.

Made in Canada

Difficulties of the Postmaster

Obscure Addresses Often Tax The Ingenuity of Officials

One of the problems faced by the postmaster, and more often than not, solved by the postmaster, is the obscure address. Recently two letters were received at the Winnipeg post office—letters which, he remarked, have since reached their destination—that for a time taxed the ingenuity of the officials.

The first was addressed to a party at the "Seipor Hotel, Winnipeg, Canada." To look at this address is to be mystified; but to say it over aloud is to discover at once that the writer meant "C.R. Hotel."

The second was a little more puzzling. It was addressed as follows: Sun Rises 4:51 sets 20:18. Moon Rises 17:54, sets 2:1.

Winnipeg, Man., Canada.

The post office address experts, however, ultimately got to the bottom of this cryptogram. They remembered that the Morning Free Press has for some time made a practice of placing at the top of the front page the day's meteorological record. The couplet was therefore marked "Try Free Press." Upon reaching its destination it was found to contain the payment for a year's subscription to the Free Press, from a foreign-born Canadian citizen in British Columbia.

Prairie Chickens Scarce

Prairie chickens are not plentiful generally on the prairie this year, according to the statement of the chief game guardian for the province of Saskatchewan.

Reports from issuers of licenses show that good hatcheries are practically all the better, with very few less the open prairie. According to reports, good hatcheries were observed in 15 localities and poor hatcheries in 92 localities.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying the best of remedies—Mother Graves' Worm Exterminator.

150 Year Old Grape Vine

At Hampton Court, London, in one of the greenhouses is the famous vine planted in 1768 by "Capability" Brown, a famous landscape gardener of the eighteenth century. The vine is the Black Hamburgh variety. The fruit in recent years has been good, but this season the number and quality of the bunches is rather above the average. The girth of the stem is five feet at the base. Several years ago twelve bunches of fruit from the wonderful vine were shown at a Royal Horticultural Society exhibition and the combined weight was 42 pounds.

**SHORT OF BREATH
Could Hardly Walk
Without Resting.**

When you go to a physician to be examined for any heart trouble one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected there ensues a feeling of a choking sensation, a shortness of breath, palpitation, throbbing, irregular beating, smothering sensation, dizziness and a weak, sinking, almost feeling of oppression and anxiety.

On the first sign of the heart becoming weakened or the nerves unstrung Milburn's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

Mr. Stephen Crouse, East Clifford, N.S., writes: "I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Milburn's Heart and Nerve Pills and I felt better after taking them; three boxes made me quite well. I am now helping my son to work the farm, and can truthfully say I feel like a different man."

Price 50c, a box at all dealers or mailed direct on receipt of price by The T. Milburn Co. Limited, Toronto, Ont.

British Big Bertha

A Huge Gun With a Range of Eighty Miles

When the freedom of Sheffield was conferred on Earl Beatty, the fact that super "Big Bertha" was being built at Vickers' works was disclosed by the Lord Mayor. Its length is 80 feet and it can throw an eight-inch shell between seven and eighty miles. In consequence of the extraordinary high velocity of the projectiles, the gun will need re-loading at frequent intervals. An earlier gun of this type was delivered to the government after the signing of the armistice.

Refloat Vindictive

The British light cruiser Vindictive which was sunk in the entrance of Ostend harbor on May 11, 1918, and which has blocked that port since that time, has been refloated and the port is again open for traffic. The sinking of the Vindictive was one of the most thrilling events of the last year of the war.

Black Bass for Lake Nipigon

The south end of Orient Bay on Lake Nipigon, and Keweenaw Lake were recently stocked with three hundred black bass. The fish were shipped from Toronto in tanks and deposited in the water by Neil McDougall, sportsman's representative of the Canadian National railway.

They Soothe Excited Nerves. Nervous affections are usually attributable to defective digestion, as the stomach dominates the nerve centres. A course of Farnell's Vegetable Pills will still all disturbances of this character, and by restoring the stomach to normal action relieve the nerves from irritation. There is no sedative like them and in the correction of irregularities of the digestive processes, no preparation has done so effective work, as can be testified to by thousands.

The various diamond mines in South Africa yield stones with such distinct characteristics that they are readily classified as to their origin by experts.

Accept "California" Syrup of Figs

only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Speed Laws Slow in Earlier Days

In 1896 motor cars were permitted by law to operate upon the public thoroughfares of England at a rate of 12 miles per hour, and in Scotland, at the rate of 10 miles per hour.

Empress of Canada
Launched at Glasgow

Will be Largest Vessel Running On The Pacific

The Empress of Canada, for the Vancouver-Japan service has been launched by the Fairfield company, Glasgow, and is the largest liner built by the company. It will be the largest running on the Pacific. It is a vessel of 22,000 tons capacity, splendidly planned and besides spacious ordinary accommodation, has special features, viz: a gallery 110 feet long, and a swimming bath thirty feet long.

The ship leaves Liverpool in March next and will make a world's tour on the way to Pacific station.

MOTHER!

"California Syrup of Figs"

Child's Best Laxative

Accept "California" Syrup of Figs only—look for the name California on the package, then you are sure your child is having the best and most harmless physic for the little stomach, liver and bowels. Children love its fruity taste. Full directions on each bottle. You must say "California."

Speed Laws Slow in Earlier Days

In 1896 motor cars were permitted by law to operate upon the public thoroughfares of England at a rate of 12 miles per hour, and in Scotland, at the rate of 10 miles per hour.

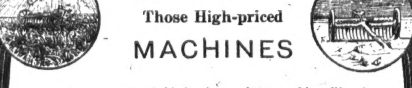

Waste is a Crime

These Days

SAVE

Those High-priced

MACHINES

An unprotected boiler has only a working life of 180 days—and so it is with all other machines. An actual depreciation of 15 to 25% when left to the weather. When housed properly the depreciation is reduced to the ordinary wear and tear caused by the work—3 to 10%. An implement shield that contains housing for your machines, a tool room and a garage would be the ideal compact arrangement for the protection and upkeep of your machines. This is a precaution that pays handsome reward to the farmer.

BUILD NOW

See the many plans for up-to-date implement houses at your nearest lumber dealer. He is fully equipped to render every assistance in the planning of your buildings. He has plans, working drawings and full particulars. His assistance is free. Most dealers have a splendid book of 100 pages on "Better Buildings," of which they'll be pleased to let you have a copy. Go and see him now.

The Announcement is covered by the Lumber Manufacturers of Western Canada.

Irish Rebels Continue Outrages Without Abatement

Roscommon, Ireland.—A woman, accused of violating the boycott against the police by supplying policemen with milk, is reported to have been seized by four men who fastened pig rings into her flesh with pinners. The things were not removed for two days.

Mullingar, Ireland.—One hundred armed raiders attacked the police barracks at Ballymalon, near here, and compelled the garrison to leave the premises, after a battle lasting an hour. Rifles and bombs were used by the party. The barracks were burned.

Stout resistance was offered by the policemen until the commanding sergeant was badly wounded. The raiders permitted the policemen to depart unmolested after they had turned over the barracks.

Dublin.—Mail robberies again have been carried out here. Armed raiders held up a train from Cork for Macroom, and seized the official mails. Another train was stopped at Newcastle, County Wicklow, and official mail stolen.

Success of Poles Continues

Dispatch Says Three Red Division Were Annihilated

Berlin.—The Poles have taken Brest-Litovsk, according to a Warsaw dispatch dated Thursday. The dispatch says three Bolshevik divisions were annihilated in the operation around Warsaw.

Warsaw.—Poland's army is rapidly following up the retreating enemy northeast and east of Warsaw, and further successes for the Poles are reported. The capture of Sokolow, Drohiczyn and Biala with thousands of prisoners and great amount of war materials, is reported in an official communiqué. At Siedlce the Poles have captured armed volunteer Jewish detachments composed of local communists.

To the northwest of Warsaw the Bolsheviks attacked Plock in a drive designed to carry them across the Vistula, where there is a pontoon bridge, but a Polish counter-stroke broke the attack. In this operation, the Poles were aided by cavalry, who fought side by side with the infantrymen.

Peasants in the region of Lipno, southeast of Thorn, are reported to be fighting the Bolsheviks with axes and scythes. Newspaper accounts of the operations there say the peasants are taking no prisoners.

Shipping Lines Want Increase

Involving Approximately Sixty U. S. Steamship Lines

Washington.—Great Lakes, Coastwise and gulf carriers, urged the United States shipping board to grant applications involving approximately sixty steamship lines for rate increases in connection with the advances already allowed the railroads by the inter-state board of commerce. A majority of the lines are now operating at deficits which threaten their existence, it is said. H. Manthorn was told by witnesses. Representatives of shippers are now being heard. Owing to the short time until increased railway rates become effective, efforts are being made to expedite the hearings.

Lipton Addresses Convicts

Ossining, N. Y.—Sir Thomas Lipton visited Sing Sing prison and was given a long ovation by the inmates whom he addressed in the prison yard.

"I am very much gratified, boys," said Sir Thomas when the cheering subsided. "There never was a man born who did not make mistakes. The thing is, when we grow older, not to make the same mistakes again. I've made them and I guess most of you have."

The Irish baronet was presented with a hand-painted souvenir, made by the inmates.

Hunger Strikers are Ill

Cork.—Four hunger strikers in the Cork jail have been removed to the city hospital. The strikers will die, it is reported, and the mayor has written to Cardinal Logue notifying him of this. He has also written to all mayors and lord mayor in Ireland to the same effect.

This Is Not Cruelty

Winnipeg.—It is not cruelty to animals to feed a live chicken to a snake. Sir Hugh John Macdonald made this ruling in the police court when the humane society prosecuted a snake charmer for feeding a chicken to a boa constrictor.

Mayor of Cork Gets Two Years

Cork.—The court martial which recently tried Terence MacSwiney, lord mayor of Cork, on a charge of having under his control the secret police cipher, announced a sentence of two years' imprisonment.

AMENDMENTS TO COVENANT MAY BE MADE BY LEAGUE

London.—Headquarters of the league of nations announced that four important amendments to the covenant have been suggested by Denmark, Norway and Sweden for consideration at the first meeting of the League assembly on November 15. The four proposed amendments were announced as follows:

1.—Providing for a fixed annual meeting of the assembly and proposing that ten members of the league can demand and secure a special meeting at any time at the seat of the league.

2.—Seeking to regularize the method of selecting four non-permanent members of the council. It is proposed to accomplish this by providing that the assembly, after making the first selections of four to serve respectively, three, four, five and six years, shall name a new state yearly after the third year to serve four years and not be subject to re-election for the following period. It is suggested that this method would secure successive representation of the council of a large number of states, and would maintain continuity in the composition of the council.

3.—Making the obligation for arbitration more absolute by omitting the word "generally" from Article 13 in the paragraph beginning "Disputes," and ending "submission to arbitration."

4.—Permitting the council to authorize a state in the vicinity of a state against which a blockade is in force to maintain a degree of intercourse with the latter, provided this council considers this necessary to prevent the blockaded state from attacking its neighbor.

Liberal Leader to Tour West

Mackenzie King to Address Meetings in Western Canada

Ottawa.—Arrangements for the tour of Western Canada this fall to be made by Hon. Mackenzie King have been almost completed. While the king will address the electors at the various points, the name of Ernest Lapointe, member for Quebec East, has been mentioned as among those likely to make the trip.

Before commencing his tour, it is understood that Mr. King plans to pay a short visit to his brother, who is in Denver, Colo., and that he will go direct from Denver to Victoria in time for his first meeting.

Manifesto to Workers

Says Danger of War With Russia is Not Over

London.—The "council of action" of the British labor party, after a long discussion, issued a new manifesto to the workers of Great Britain, declaring that the danger of war was not over.

"This," the manifesto says, "is not the time to be deceived by seeming fair words. Why does not the Premier announce the terms on which England will make peace with Russia? Why is the position with regard to the adventures of General Wrangel submerged? The manifesto demands a full peace, together with a resumption of trading with Russia and exhorts the workers not to relax their efforts in this direction."

The council has not yet received any word from William Adamson and Harry Goulding, representatives of the council of action, who went to Paris to confer with the labor federation and the executives of the United Socialist party.

Gen. Seely to Visit Canada

London.—General Seely will visit Canada in September, he announces: "In the fulfillment of a promise made to the cavalry brigade he commanded in the war to see them in Canada as soon as he could after peace was declared."

Julioase New Governor-General

London.—Viscount Jellicoe has left for New Zealand to assume his duties as governor-general.

Claim Railway is Facing

A Heavy Deficit

Council Suggests There is Less Need For Increased Rates In the West

Ottawa.—An interesting development in the hearing before the rail commission of the application of the Canadian railways for increased freight rates and passenger rates occurred when H. J. Symington, counsel for the government of Manitoba, threw out the suggestion that, in view of the fact that operating expenses are lower and earnings higher on western C.P.R. lines, the same necessity does not exist for an increase of rates in the west.

Mr. Symington had been examining W. J. Moule, assistant controller of the C.P.R. at length on the cost of operating in the east and west. It being shown that during the past four years net operating expenses in the west are lower than in the east, and the net earnings per train mile are higher, those for 1919 being approximately eighty per cent higher.

"Would you say in view of the figures," asked Mr. Symington, "that freight rates should be the same in the west as in the east, if the increase is to be upon the basis of paying money for services rendered?"

Mr. Moule, in reply, said that the operating expenses in the east are largely incurred for the benefit of the west. These include large expenses for port terminals, etc. For this reason, he said, operating ratios are not a proper indication of the earnings of eastern and western lines. Expenses in the east of this kind were not he said, spread over the entire system. "Is not more traffic originated in the west for the long haul?" asked Mr. Symington.

Mr. Moule: "I suppose it is."

"Even so," interposed Chief Commissioner Carvell, "does it not have to be transported over one thousand miles of waste country?"

Mr. Symington remarked that it was strange that the Lake Superior C.P.R. division was one of the best paying divisions of the C.P.R. Commissioner McLean compared the Superior division to a bridge which must be maintained, and Mr. Carvell said that without it, production in the west would not amount to much.

Mr. Symington remarked that the west originates most of the traffic and to this Chairman Carvell agreed, "If it were not for the west," he observed, "that section of the railway would not be there and the line would not exist. It would take a powerful argument to convince him that it was a paying piece of railway."

Earlier in Mr. Symington's examination of Mr. Moule, he emphasized the movement of wheat from the west, contrasting the ratio with other commodities.

Mr. Moule said that while it was not necessarily so, the cost would come down as the density of traffic increased till the point was reached where the line would become a choice. "It costs less to move grain on the prairies than any other traffic," asked Mr. Symington.

"Yes, but we have a very low rate on it," Mr. Moule replied. The fight throughout the entire sitting was centered on the statement submitted last week by the C.P.R. and designed to show the need of that company for higher rates if it is to be prevented from having a deficit during the year which will end June, 1921. In that statement it was shown that the C.P.R. faces a possible deficit of over thirty-seven millions of dollars if the existing scale of rates is continued in force.

Fought Rates on Coal

Convention Asking Special Consideration of the Coal Tariff

Calgary.—Protests against the proposed general increase in freight rates, insofar as they apply to coal, were voiced at the convention of the western Canadian coal operators and retail dealers from Winnipeg, west. The convention passed a resolution asking special consideration of the coal tariff. "That the same may be equitably adjusted in proportion to other commodity tariffs and to the comparative services rendered and required."

Vancouver Gets Ship Contract

Vancouver, B. C.—The Canadian Pacific coast steamship service has let the contract to the Wallace Ship yards of North Vancouver for a new passenger steamer for the coast service. The new vessel will replace the Princess Sophia, which was lost on Vanderbilt Reef, on October 24, 1918. She will cost \$1,500,000, and will be 325 feet long, with a speed of 17 knots, and will be especially built for the run.

Floods in Japan

Honolulu.—Tremendous floods are sweeping portions of the islands of Kyushu and Shikoku, southwest of Honshu, the principal island of the Japanese group, overwreathing the towns and villages with an enormous loss, is reported by cable advice to Nippon Jiji, Japanese language newspaper.

In Vile Austrians to Congress

London.—Germany, Bavaria and Austria—Hungary have been invited by the League of Nations to participate in the financial congress to be held in Brussels on September 24.

Prohibition Campaign in Scotland

London.—A vigorous campaign for prohibition along local opinion lines has just opened in Scotland and promises well, for several centres are voting for prohibition.

Mennonites Visit Quebec

Submit Document to Officials Outlining Desires For Freedom

Quebec.—Seven representatives of the Mennonite colonies in Manitoba and Saskatchewan waited on Hon. L. A. Taschereau, premier of the province of Quebec, and submitted a lengthy document setting forth their beliefs and customs, as well as the privilege they desire should they decide to come and settle in the province of Quebec.

The document states that the Mennonites, fearing that their language and religion may be taken from them in the provinces where they now reside, see themselves compelled by their conscience to look for another home where they may live up to their religion without being molested or restricted.

The delegation, including two bishops of the Mennonite church, was received by Premier Taschereau, accompanied by Hon. J. E. Perreault, minister of colonization, mines and fisheries, and J. N. Miller, secretary of the Catholic committee of the council of public instruction.

After listening to the reading of the document submitted by the Mennonites, Mr. Taschereau told the delegates that the province of Quebec was open for inspection. They were free to visit the colonization districts and to study the customs and laws of the province of Quebec. The premier then reviewed the school system of the province as well as referring to the laws of the province in general.

Officials of the Quebec government made it plain that no steps were taken after the reading of the document submitted by the Mennonites to interview the government was entirely their own undertaking.

Manitoba's Wheat Crop

Worth \$117,500,000 According to the Latest Estimates

Winnipeg.—Manitoba's wheat crop this year is worth approximately \$117,500,000 to the producers. That is the estimated value reached by computation based on the report of the Manitoba department of agriculture on crop conditions throughout the province, just issued.

According to the report, an average yield of wheat throughout the province will be 17.5 bushels per acre. The estimated average in the province is 2,687,000 acres, giving a total estimated crop of 47,027,500 bushels.

Grain men report that the farmer probably will realize an average price of \$2.50 a bushel for wheat this season, which shows the value of the crop at far more than \$100,000,000.

Want Alberta Coal

Ontario Mining Association Will Take the Matter Up With the Government Commission

Sudbury, Ont.—Exploring the unfavorable trade balance existing between Canada and the United States and proving by statistics that the major portion of this adverse state of affairs was due to Canada's tremendous importation of iron ore and steel products, the Ontario Mining Association appointed Col. R. W. Leonard, George E. Cowie, and A. J. Young, a committee to tender assistance and represent the views of the mining industry of northern Ontario before the government commission now investigating the possibilities of the iron ore industry in Canada. Government assistance in the beneficent of iron ores to smelter grade was accepted in principle, as being highly desirable, and the combination benefited iron ores of New Ontario and coal from Alberta was accepted as commercially practicable.

No Restricted Bird Areas

Ottawa.—It is announced by the department of the interior that the regulation in the Migratory Birds act which sets apart certain areas within provinces as bird sanctuaries, is to be suspended in Alberta as from September 1. This means that sportsmen will have no restricted areas in that province for the shooting of ducks, geese and other migratory birds.

Outbreaks in Mesopotamia

London.—The United States announced fresh outbreaks in Mesopotamia on a scale which has not been known since the outbreak of the Mesopotamian revolution. The outbreaks have been at Kirin and Kirkuk and several of the railway bridges burned. The statement states that revolutionary movement instead of being political has now become anarchistic. The movement of reinforcements from India is proceeding.

Harvest Hands Still Coming

Winnipeg.—With the arrival of 4,600 harvest hands in Winnipeg, the total number that has reached the west is now 30,000. Workers will continue to arrive the rest of the week, then the rush will be over, the railway officials said.

Rumors of Insurrections in Korea

Tokyo.—Advisers from Seoul say there are rumors that Koreans are planning insurrectionary demonstrations against the Japanese. The Japanese government has sent a large force of the United States congressional party to that city. The United States congressmen are at present in China, returning from an inspection of affairs in the Philippine Islands.

Munitions are Barred

Brussels.—The Belgian state railwaymen's syndicate has decided to prevent the transportation to or through Belgium of troops or munitions intended for Poland. This decision follows similar action by Antwerp dockers.

To Open Fairs in B. C.

Ottawa.—Dr. S. F. Toller, minister of agriculture, will attend the Toronto exhibition during the last week of August and the first week of September. He is scheduled to open a number of fairs in the coast province.

Says Trainmen Not Exploiting Public

Explains That Five-Hour Day is Not Equivalent to Eight-Hour Day of Industry

Toronto.—Declaring that "certain evidence regarding the five-hour day," as given before the Dominion railway commission in connection with the application for increases in freight rates has been misunderstood, and used to make it appear that the strongly organized trainmen, by their demands, have been exploiting the public, and are reported for the further rate increase, a statement has been issued by the executive of the union.

The principal contradictions are as follows:

1.—The basic five-hour day for passenger engineers is not equivalent in any way to the eight-hour day in industry. It is a minimum guaranteed day measurement, for special occasions, very seldom used. The general rule is that engineers in the passenger service are paid on a mileage basis. Their hours of work are most irregular, often extending from twelve to eighteen hours on a single trip.

2.—There is not a great deal of overtime in the wages of trainmen. Operating passenger trains do not get time and a half for overtime. The only men who receive this are the trainmen and engineers on the slow freight service, which is not the general rule.

3.—It is true that time as well as mileage is one of the factors that determine pay, and that delay is sometimes paid for, but this is only on special occasions, and it is untrue to say that there is any inducement for engineers to run slow or to strive for delays. The inducement is all for operating on time.

4.—The present salaries for engineers run from \$200 to \$250 a month. Their hours are usually very long and irregular, and they are the poorest paid of the highly skilled mechanics operating the men engaged in that kind of work.

Gruesome Discovery

In Hudson River

Headless and Limbless Body of A Woman Is Found By Longshoreman

New York.—The torso of an unidentified woman with head, arms and legs chopped off has been found in the Hudson River.

In clinging to the skin were shreds of clothing of fine material and minute pieces of wrapping paper. This indicated, according to the police, that before being cast into the river the torso had been wrapped in heavy underwear or a blanket and this in turn covered with heavy wrapping paper and bound with strong cord.

The police explained the operation that the package probably had been weighted down, but that water had rotted the wrappings and the torso floated to come to the surface.

Medical officers claimed that it had been in the water about two weeks. The police believe that the woman was about 25 or 30 and weighed about 130 pounds.

For Strike Leaders' Release

Deputation Headed by F. J. Dixon Plead Cause of Prisoners

Ottawa.—Pleading the cause of the imprisoned Winnipeg strike leaders, a deputation, headed by F. J. Dixon, leader of the Laborites in the Manitoba Legislature, waited upon two members of the government. It is understood their plea was to the effect that the recent election in Winnipeg demonstrated the people's confidence in the imprisoned men, and served to show that the bulk of public opinion is behind the attitude of the men in facing a general strike, and that few people believe the imprisoned men had any seditious intentions.

Friends of the imprisoned men here believe that there is every prospect of an early release for the men.

Finishes Trip to Dawson

Dawson.—H. Kinsley, son of Sir Robert Kinsley, governor of the Hudson's Bay company, has arrived here accompanied by T. P. O'Kelly. They left the Hudson's Bay company, which has been in charge of the Mackenzie river to Fort McPherson and by way of the Porcupine river to this city. They are leaving by steamer for Vancouver by way of White Horse and Skagway.

Munitions are Barred

Brussels.—The Belgian state railwaymen's syndicate has decided to prevent the transportation to or through Belgium of troops or munitions intended for Poland. This decision follows similar action by Antwerp dockers.

To Open Fairs in B. C.

Ottawa.—Dr. S. F. Toller, minister of agriculture, will attend the Toronto exhibition during the last week of August and the first week of September. He is scheduled to open a number of fairs in the coast province.

Disastrous Fire in Chilliwack

Chilliwack, B. C.—Fire caused damage amounting to sixty thousand dollars in the business section of the city. The fire started in the city of Chilliwack Electric company, S. Houston and F. Green.

Good Relations Restored Between France and Britain

TEN THOUSAND PRISONERS TAKEN BY POLISH ARMY

Warsaw.—The Polish offensive is now in full swing. More than 19,000 prisoners, 30 cannon, 300 machine guns and thousands of supply cars have been captured from the Bolsheviks. The Poles have occupied Ploviski, Pultusk, and Wyskow, through which the Reds drove in their sweep towards the capital.

Owing to the Polish pressure from the northeast, it is reported that the Reds are withdrawing their forces to the Vistula, south of the Prussian border and to the northwest of Warsaw.

The Poles are reported to be regrouping before Warsaw for a counter-offensive against the Bolsheviks, who are less than 30 kilometers from the city. In the region of Thorn, about 105 miles northwest of Warsaw, the Poles have launched a counter-attack in the direction of Brodnica, which is still occupied by the Bolsheviks. In the region of Lipno, about 25 miles southeast of Thorn and at Siedlce, the Bolsheviks have started an eastward movement, aviators report.

Soviet prisoners are pouring into Warsaw in such numbers that it is becoming a problem how to care for them.

Paris.—Polish forces are advancing with undiminished speed along the line running from north of Warsaw to Wlodawa, about 110 miles southeast of Warsaw. Principal interest, however, attaches to the manoeuvres of Gen. Bluski's forces. Massed reserves which he had concentrated at Vangorod, southeast of the capital have advanced 60 miles in three days and effected a junction with another army operating from Chelm, United. These armies were within 18 miles of the strongly fortified Brest-Litovsk, 12 miles east of Warsaw at noon on Wednesday, and have now probably recaptured that important centre of communication which the Reds, last against British in Mesopotamia has been received here. The message says that Mr. Drigley, a political officer, Brandfield, commandant, and two British non-commissioned officers were killed at Shab Raba, Mesopotamia, last Sunday by Arabs. With dramatic brevity, the message adds: "The officers with their lives gallantly resisted overwhelming numbers for three days, until their ammunition was exhausted. The Arab levies were loyal to the end, and died fighting side by side with the British."

Kill British Officers

Arabs Kill Four British Officers In Mesopotamia

Bombay.—Another tragic spectre of the series of Arabian "methals" against British in Mesopotamia has been received here. The message says that Mr. Drigley, a political officer, Brandfield, commandant, and two British non-commissioned officers were killed at Shab Raba, Mesopotamia, last Sunday by Arabs. With dramatic brevity, the message adds: "The officers with their lives gallantly resisted overwhelming numbers for three days, until their ammunition was exhausted. The Arab levies were loyal to the end, and died fighting side by side with the British."

Vancouver Airman Killed

Loose Life in An Accident Over English Bay

Vancouver, B. C.—The sight of his wife and many hundreds of people on the beach, Bert Brenton, purchasing agent for the Union Steamship company of British Columbia, either jumped or fell to his death in the water of English Bay when the seaplane he was piloting became unmanageable and crashed into the sea.

Before the actual fall an explosion was heard and smoke was noticed near the engine and the seaplane turned over seven times in its descent. The machine was brought to shore by a tug and a search is being made for the pilot's body.

Brenton was about a mile out at sea when the accident occurred. He had made a flight over the city previously. He was an experienced aviator, having won active service overseas, being a captain in the Royal Air Force. He is the last of three brothers, the other two having been killed overseas.

E. H. Beasley, general manager of the same company, was killed in an airplane accident at Misora park a few months ago.

Says Indians Start Forest Fires

Calgary, Alta.—That the roaming Indians are to blame for many of the bad forest fires that do incalculable damage every year in British Columbia and Alberta, is the frank statement of C. H. Horne, federal superintendent of forest reserves in Alberta. Mr. Horne further intimates that the department of Indian affairs do not act in the matter, and that, therefore, as there is no law under which the redskin can be punished, he destroys wealth recklessly and wilfully.

Pay Voted of V. C. Heroes

Ottawa.—It is announced by Hon. Hugh Guthrie, minister of militia and defence, that the government has decided to assume the railway expenses in connection with the plan of bringing together all Canadian Victoria Cross heroes at Toronto. A deputation, headed by Captain Macdonald, recently urged that the government assist the plan. It is expected that the cost of railway fares will be to the neighborhood of \$5,000.

London.—The official entente between France and Great Britain has been more or less restored, says a Paris dispatch to the London Times. Following an extended interview with Premier Lloyd George, the dispatch adds, the Earl of Derby, British ambassador at Paris, again visited the French foreign office and "the more immediately delicate moment in Anglo-French relations has passed."

The ambassador now, the Times states, feels justified in resuming his vacation.

Although no new fact has arisen to bring the French and British policy in the Russian-Polish situation in closer harmony, the Times points out, the series of conversations which have been going on in Paris developed the fact that the fundamental difference between France and England is on the Polish question and that the two countries are in complete agreement on other issues.

Must Obey School Laws

No Special Treatment For Mennonites in Manitoba

Winnipeg.—If the Mennonites stay in Manitoba they can expect no special dispensation, government officials here have declared. They are not persecuted in any manner, simply being required to abide by the country's laws, as are others.

Robert Fletcher, deputy minister of education, stated that the Mennonites will not be considered apart from other residents. "The schools will open on September 1," Mr. Fletcher said, "if they do not conform to the school regulations they will be subject to the usual course that we take in such matters. They must receive and accept the same treatment that other citizens of the province receive."

Kill British Officers

Arabs Kill Four British Officers In Mesopotamia

Bombay.—Another tragic spectre of the series of Arabian "methals" against British in Mesopotamia has been received here. The message says that Mr. Drigley, a political officer, Brandfield, commandant, and two British non-commissioned officers were killed at Shab Raba, Mesopotamia, last Sunday by Arabs. With dramatic brevity, the message adds: "The officers with their lives gallantly resisted overwhelming numbers for three days, until their ammunition was exhausted. The Arab levies were loyal to the end, and died fighting side by side with the British."

Germans May Help Bolsheviks

Trotzky Negotiating Secretly With German Staff Officers

At Trotsken

London.—A despatch to the London Times from Danzig says Leon Trotsky, the Bolshevik minister of war, arrived at Trotsken, on the East Prussian frontier, about 110 miles east of Lyck, secretly from Bialystok to negotiate political and strategic questions with German staff officers. A preliminary conference of Soviet and German officers occurred August 12 in East Prussia.

The despatch adds that the Danzig assembly, in the absence of its Polish members and against a vote of the independent socialists, has passed a resolution remanding powers for the declaration of neutrality in the Russo-Polish war.

It is asserted by the correspondent that German volunteers from East Prussia are forming an army near to Vilna to march ostensibly as a revolutionary army into East Prussia and bring about joint action by East Prussia and the Soviet with Poland.

Says Indians Start Forest Fires

Calgary, Alta.—That the roaming Indians are to blame for many of the bad forest fires that do incalculable damage every year in British Columbia and Alberta, is the frank statement of C. H. Horne, federal superintendent of forest reserves in Alberta. Mr. Horne further intimates that the department of Indian affairs do not act in the matter, and that, therefore, as there is no law under which the redskin can

Normal School Students are Enrolling Rapidly

Higher Salaries, Government Loans, and Better Living Conditions For Teachers are Proving Attractive

The minister of Education states that, in spite of the large number of failures at the recent examinations, prospects are bright for full classes at all three Provincial Normal Schools. Many who passed the examinations and who had not previously intimated their intention of attending Normal School, have changed their plans and are applying for admission. Already more than two hundred and fifty (250) fully qualified students have made application.

Teaching is More Attractive

The higher salaries now being paid to teachers, the larger number of attractive positions being offered in consolidated and two room schools and in high school work, and the better living conditions offered by teachers' residences, of which there are now 250 in the province, are having their effect. The government loan to cover the cost of Normal School training is also proving the deciding factor in many cases.

Conditioned Students Applying

In addition to the 250 fully qualified to enter Normal, quite a number of those who failed at the recent examinations are being attracted by the opportunity to get high school work and professional training at the same time. Of these only those who made a reasonable showing in the examinations are being considered, but the opportunity is so very attractive that the enrolment promises to be very considerably augmented from this source.

The Schools Opened Aug. 24th

The Normal Schools opened Tuesday August 24th, but, owing to unusual conditions, students will be admitted for a few days more, and applications should be made immediately to the Registrar, Department of Education, Edmonton. It is not necessary for those students who require Government loans to arrange for the loans in advance. A representative of the Department will be at each Normal School for the first few days after the opening and will personally take applications for loans and give all information pertaining thereto.

The Aspern Beach Trouble

One whole week has passed since Annie L. Mobley gave the village council the privilege of purchasing her alleged rights to the front of all the cottages on this sub-division, and we have not heard of anyone coming through with the twelve thousand and six hundred dollars she requires to keep down fences. Annie L. should be just a little careful when she commences to build the fence, and we would suggest that she procure an engineer to fix the lines of her alleged heritage before she gives the order to the contractor. Civil engineers are human beings, and as such have been known to err, make mistakes and do other wrongful things. The engineers who have been doing survey work on Gull Lake have more than one piece of work glaring inaccuracies have been discovered. One instance in particular, on the Wiesse sub-division, where the engineer completely lost 100 feet of beach

front and it stayed lost for about 10 years, although right next door to the writer's lot, and would not have been discovered yet had we not tried to show Mr. Wiesse that another hundred feet had grown to our land. At the other end of the beach, one person's lot overlapped about three quarters over another's. This is attributed to the fact that the bracing sunshine and limpid waters of the lake give one that tired feeling, and an utter don't-care-a-darn feeling, and too much reliance should not be placed on work done under such beautiful conditions. But—

The resident owners in the Aspern Beach sub-division, put on the market by Mrs. Mobley, with J. D. Skinner and others as selling agents, with the exception of two lots in the centre of the plan, are entitled to lots 200 feet in length from the roadway behind to the lake front. We will bet a nickel that a great many of the lots do not take up the full 200 feet without going out on the sand. Another thing we are almost sure of is that the lines as run by the surveyor of Aspern are not correct by matter of more than 10 feet, and if the lines are out say 10 feet, there would be very little dry land between the 200 feet mark and the water. Which leads us to suggest that Mrs. Mobley make a survey of the subdivision before starting anything.

Masquerade at the Lake

Over one hundred merry masqueraders thronged the Pavilion at Gull Lake on Wednesday evening last, and every one of them were there to have a good time. Every type of man and woman, ancient, modern put in an appearance, from His Satanic Majesty to good old St. Peter. The costumes were nearly all strictly original, most of them being fashioned from material rustled among the homes on the beach, window curtains, rugs, blankets and towels being easily distinguishable. The weather was just right for dancing, and they all did surely dance. Prof. Touche's orchestra provided the music, and he introduced several new features greatly appreciated.

St. Andrews Presbyterian Church

Morning 11 a.m. Evening 7.30 p.m. United Services with Grace Methodist Church.

Preacher Next Sunday—Rev. J. M. Fawcett.

You are cordially invited to these services.

Ernest J. Packer Bentley--Alberta

Piano and Organ Tuner and Repairer Agent for Mason-Risch Pianos

Lessons Given in Violin, Piano and Singing Phone 9

The floor was good and Mrs. Doherty, as usual, saw that everyone had a good time. It has got so at the Lake that a dance would not be considered a dance at all should her happy, smiling face not be in evidence, and the cottagers hope that the same management will have charge next year, and for many years.

Dancing commenced at nine o'clock, and the maskers had the floor for the first hour when judging took place, and the Pavilion was open to everyone. It was hard for the judges to make decisions, there were so many really classy costumes on the floor, but after some time decisions agreeable to all were given.

For the most original Lady's Costume, Miss Freddie Halpin, as a "Hawian" maiden, took the prize; the most original gentleman was Capt. Walter Hale, of Edmonton, "Turk".

Mrs. A. R. Williams, "Topsy" carried off the lady's comic prize, with Rocky Stuart, as "Patches," carrying off honors in the gentlemen's class.

The judges were Mrs. W. L. Elliott Miss MacDonald and Mrs. Royston.

Bryant Washburn, Celebrated Star

Friday and Saturday, Aug. 27-28

Universally recognized as one of the most talented and popular screen stars, Bryant Washburn, has a large and constantly increasing clientele. Handsome, athletic and filled with the buoyancy and spirit of youth, Mr. Washburn always impresses his audience favorably and rouses within them the same enthusiasm for his work that he himself displays. In his latest starring vehicle, "It Pays to Advertise", Mr. Washburn has the role of a young man who proves a success in life, when all the indications were that he would be an irretrievable failure.

He changes from a Mollified to a respected business man, and in addition thereto, he wins the love of a real girl, the respect of his doubting father and a bunch of real money. In other words, he believes in the adage that "it pays to advertise" and he carries his thoughts along this line into restful action.

That this admirable photoplay will enhance Mr. Washburn's reputation for versatility, there is little doubt. His artistry, personality and dash are evidenced to the full in his characterization in this comedy and his admirers have an hour of genuine enjoyment in store for them.

From a Poor Shepherd Boy to a Great Sculptor

IS THE STORY OF

Paul Darde - The Great French Artist

With no training and no models this "stone-cutter" shapes his wonderful works of art with a pickaxe. He creates his figures from his mental conceptions.

Read the story of his career in next Saturday's Journal and don't forget the story by C. E. Van Loon.

"The Whispering Shadows"

The Edmonton Journal.
